

**DASAN Zhone Solutions**

# CORPORATE PROFILE

## DASAN Zhone

The global demand on bandwidth continues to grow. The world is already dominated by data usage from computers, smart phones and tablets and various new devices continue to pop up almost daily. Service providers and enterprises are under immense pressure to connect more people with faster and more reliable service, while also anticipating future needs.

**DASAN Zhone Solutions, Inc.**, is a global leader in providing innovative copper and fiber network access solutions to leverage bandwidth for Carrier and Enterprise businesses now and in the future. We specialize in Broadband Access, Mobile Backhaul, Ethernet Switching, Passive Optical LANs and Software Defined Networks.

At **DASAN Zhone Solutions**, we are proud to do business in over 50 countries across the globe serving thousands of customers daily. We are the number one FTTH provider in Korea and in the top five worldwide. Our holistic approach is centered on the transformation and enhancement of connectivity, providing the foundation for advanced communications and improving the communications experience for customers.

**DASAN Zhone Solutions** product portfolio helps companies leverage their infrastructure to meet the needs of today, while providing the foundation to stay ahead of the demands of tomorrow. Our solutions maximize performance from Access to the Edge and tightly integrate with each other to create a seamless whole.

# DASAN Zhone Solutions

## Broadband Access

- Fiber and copper access technologies delivering multi-gigabit speed enabling today and tomorrow's connected world

## Mobile Backhaul

- Backhaul and fronthaul solutions to mobile operators enabling a new level of manageability, flexibility, performance and cost

## Ethernet Switching

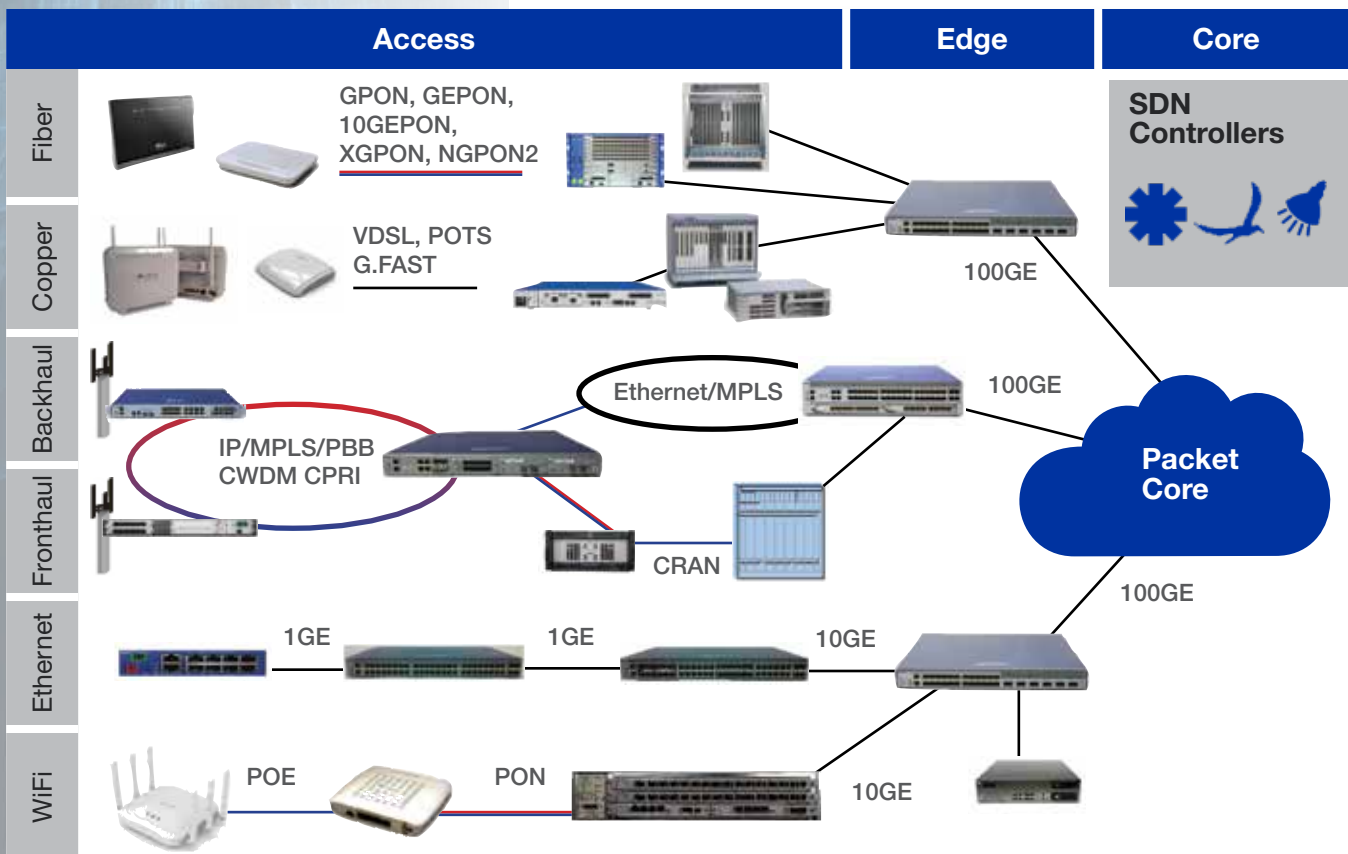

- Cost effective and easy to use Ethernet switching for today's networks enabling a migration to tomorrow's Network

## Passive Optical LAN (POL)

- Enterprise products with a new level of cost, power, space and cooling efficiencies enabling ultra high bandwidth to the desktop

## Software Defined Network (SDN)

- Simplified operations by enabling rapid deployment of new applications and services
